# The Light-weight Auger for Grain Bin Rescue!

## Protect Your Loved Ones!

The Emergency Grain Rescue Auger can quickly aid in the removal of grain which has engulfed a victim trapped in grain. The easy to use handle can be powered by any drill with a 1/2" chuck. Once the coffer dam (supplied by others) is set in place around the trapped victim, simply insert the auger's inlet end into the grain and direct the discharge away from the victim and out of the coffer dam.

## Tough to Beat

Poly Cupped Flighting is light enough and tough enough to handle anything you throw its way. With the hi-tech durability to rival steel, Poly Cupped plastic auger flighting has become the choice of the hardest-working machines around.

## Product Info

- Industrial urethane paint
- Grab handle near the head for easy handling.
- Used with cordless power drill with 1/2" chuck
- Unloads 1.5 bushels per minute
- Guarded discharge
- Works with any coffer dam!
- 5-ft overall height
- 5.0" OD Inlet Guard
- 13" Discharge Width
- Weighs only 25 lbs!
