

# POLY CUPPED FLIGHTING

[www.haulallindustries.com](http://www.haulallindustries.com)

## The Rugged Flighting That's Gentle to Grain, Seed, and Fertilizer!

### **Tough to Beat**

Poly Cupped Flighting is tough enough to handle anything you throw its way. That's why manufacturers have been including it as standard equipment for many years. With the hi-tech durability to rival steel, Poly Cupped plastic auger-flighting has become the choice of the hardest-working machines around.

### **Protect Your Seed Investment**

Poly Cupped Flighting is designed to maximize your yield potential from the start by delivering intact seed to your field! University testing concludes that Poly Cupped plastic auger flighting will only decrease germination by 1.5% and that it delivers noticeably more intact seed to your field.

- Available for 6", 7", 8", 10", and 13" augers.
- Installed on either a galvanized or a Stainless-Steel hex-shaft.
  - Runs smoother and quieter than a regular steel auger.
    - Great for custom projects.
- Straight poly flighting available for 2", 3", and 4" augers.
  - Easy to install once it's assembled.

**Box 572, Rosenort, MB R0G 1W0 204-746-8260**
