COMBINE ROLL TARPS

WWW.HAULALLINDUSTRIES.COM

Haul All Industries offers superior fitting COMBINE ROLL TARP KITS and COMBINE ROLL TARP EXTENSION KITS. To achieve this fit, each model is built based on your specific combine hopper measurements. With our spring and cable tensioning system, the tarp closes securely to protect bin contents.

FEATURES:

KEEPS YOUR HOPPER DRY

Avoid grain spoilage due to excessive rain in the combine hopper. Cover your combine hopper at anytime right on the field.

PREVENTS BLOW-OFF

Keep the roll tarp closed while harvesting light crops on windy days to avoid reduced yield. Easily crank open to gain full-bin capacity.

CUSTOMIZED TO FIT MOST COMBINES

Models available for most John Deere, Case IH, New Holland, Massey and Gleaner combines with factory extensions. Also available for Maurer and Crary extensions.

FOLD FLAT IN SECONDS FOR CONVENIENT STORAGE

Quick, one-step method to fold tarp supports flat. When roll tarp is folded flat, it adds only approx. 2 – 6 inches to the height of the combine hopper extension. Or, if more space is needed, simply remove bolts, and lift the tarp off the hopper extension

SAFE & QUICK OPERATION FROM THE GROUND

Open and close the roll tarp using a telescopic crank handle in all weather conditions.

COMBINE ROLL TARP EXTENSION KITS available for Models John Deere 9500/9600 and Case IH 2188/2388 Adds 80 bushels to your combine. Adding storage to your combine will make your harvest more efficient.

Electric motor kits also available! Easily open and close your roll tarp electronically!

"I really like the roll tarp for my 9650 STS combine. It works great and fits tight. I strongly recommend it!"
